## **EVS RECEIVES \$1.3M IN ORDERS INCLUDING 50 iBAR SYSTEMS**

**Following Milan expo, EVS sees strong orders and increased market interest for its products**

**Caesarea, Israel, November 30, 2015 — Elbit Vision Systems Ltd. (OTC: EVSNF)**, a pioneer in the science of camera-based automatic vision inspection for textile fabrics and technical webs, announced today that it received orders totaling \$1.3 million following the successful ITMA trade show in Milan. The orders included a signed contract for 50 iBar systems for one US-based customer, which is scheduled for delivery in the early part of 2016.

**Mr. Sam Cohen, CEO of EVS, commented**, “Our marketing and sales effort at the recent ITMA trade show was a tremendous success. We closed several significant orders at the show and we had many important discussions about future business. We signed one contract with a very important US partner for an additional 50 iBar systems which is our largest single order to date. These milestones highlight the escalation of our iBar land-and-expand strategy. Manufacturers are increasingly seeing our product as the unique solution for yield improvement that is a necessity in today’s textile market. This order demonstrates to us that iBar is a product with unlimited potential.”

EVS also announced that its Chief Executive Officer, Mr. Sam Cohen will present at the LD Micro Conference taking place at the Luxe Sunset Boulevard Hotel in Los Angeles, California, on Wednesday, December 2, 2015. The presentation is scheduled for 8:30am Pacific Time.

At the conference there will also be an opportunity for investors to meet one-on-one with Mr. Cohen. Interested investors should contact the conference organizers at LD Micro, or the Investor Relations team at Elbit Vision Systems at [evs@gkir.com](mailto:evs@gkir.com).

**About Elbit Vision Systems Ltd. (EVS):** [www.evs.co.il](http://www.evs.co.il)

EVS offers a broad portfolio of automatic State-of-the-Art Visual Inspection Systems for both in-line and off-line applications, and process monitoring systems used to improve product quality, safety, and increase production efficiency. EVS' systems are used by over 800 customers, many of which are leading global companies.
